

Middle/High School Discipler of Young Men and Math/STEM Teacher

The Iron Academy (Raleigh, NC) seeks a middle and high school math teacher the 2024-25 school year. In addition to the typical teaching load of three or more sections per semester, the MS/HS Math teacher—like all Iron Academy faculty members—will be fully engaged as a fellow builder of the Iron Academy discipleship community. Though we try to limit commitments outside of the school day, there are special events in the Iron Academy life in which each team member will be expected to participate.

The ideal candidate will have:

- Bachelor's degree or beyond in Math or a related field
- Two or more years of results-rich teaching experience
- Strong history of—and capacity for—discipling young men, and the energy and grit to engage fully in a discipleship community
- Exceptional classroom management skills
- Ability to make rigorous learning appealing to young men
- Articulable calling to Iron Academy's unique mission and vision
- Deep understanding of best practices in math education
- The capacity and desire to work in a close-knit team environment
- Capacity to add value as we build the finest STEM department in North Carolina
- Ability to interact professionally with parents and school-community members

Qualified and interested candidates should send a resume and cover letter via email to [**randerson@ironacademy.org**](mailto:randerson@ironacademy.org) and [**hahn@ironacademy.org**](mailto:hahn@ironacademy.org). The cover letter should communicate clearly why the candidate feels called to Iron Academy in general and to this position in particular.
